EDUCATION

University of Washington

Seattle, WA

Bachelor of Arts in Computer Science - Dean's Scholar

Graduating June 2028

- **Coursework:** Data Structures & Parallelism, Software Design & Implementation, Systems Programming, AI
- **Involvement:** Batman's Kitchen (Cybersecurity), ColorStack, CodePath, AI4All
- **2024 US Presidential Scholar:** US Dept. of Education honor for academics, leadership, and service

EXPERIENCE

Web Developer

Mar. 2026 – Present

University of Washington School of Medicine

Seattle, WA

- Develop the UWSOM Service-Learning site (Next.js, Firebase) connecting medical students with community partners, improving accessibility and SEO

Explore Intern

Jun. 2026 – Sept. 2026

Microsoft, Outlook

Redmond, WA

- Spearheaded an agentic AI calendar feature using Teams, chat, and email context to help users triage their day
- Owned a consumer growth experiment from ideation to worldwide rollout, est. **\$30M** in annual revenue
- Closed telemetry gaps across the ad funnel; built Grafana dashboards for full-funnel A/B experiment visibility

Mentor

Apr. 2025 – Aug. 2025

University of Washington Changemakers in Computing

Seattle, WA

- Mentored 40 high school students from underrepresented backgrounds through project-based workshops on AI ethics and accessible design, resume reviews, and college applications

Discovery Intern

Jul. 2024 – Aug. 2024

Microsoft, Global Customer Experience (GCX)

Redmond, WA

- Co-developed an AI adoption framework and Copilot guide, improving workflow automation for 7 teams

PROJECTS

AI Study Guide Generator | *Next.js, Python, Supabase (pgvector), Vercel*

- Built a RAG study tool that turns PDF course material into citation-backed study guides and quizzes, optimized for low-bandwidth networks and low-resource devices
- Engineered a Python pipeline that chunks and embeds PDFs into pgvector, grounding every answer in a linked source passage
- Built an evaluation harness measuring factual accuracy and hallucination rate against source material

Geometry Explorer | *TypeScript, React, Three.js, Zustand, Vercel*

- Built a 3D geometry site where students can rotate 7 solids, see live formulas, and unfold shapes into 2D nets
- Added a coordinate-plane lesson: students plot and transform polygons with auto-graded feedback, then extrude them to 3D
- Integrated an LLM hint tutor: a deterministic checker diagnoses the mistake and the model gives a Socratic hint without revealing the answer

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, C/C++, Go, R, HTML/CSS

Frameworks: React, Next.js, Three.js, Tailwind CSS, JUnit

Tools & Platforms: Git, Docker, Supabase (pgvector), Firebase, Vercel, Grafana, Azure AI Foundry, Figma
